

Time-Savings Tools for Video Assessment

Simple Recording

Multi-Camera Support

Self-record with up to nine simultaneous cameras or leverage our Zoom integration for 100+ cameras.

Slide Sync

Upload presentation slides for a split-screen view that can be synced with live or recorded videos.

Screen Sharing & Recording

Share and record documents, images and more with a large view of the presenter and larger view of their screen.

Powerful Feedback

Live & Asynchronous Assessment

Observe and assess student presentations in real time or anytime as video recordings.

Time-Coded Multimodal Feedback

Give text, audio or video feedback synced to precise moments in learner videos, and control when feedback is shared.

Customisable Marker Sets

Automate recurring feedback and flag common mistakes with up to 30 customisable video markers.

Deeper Insights

Built-In Rubrics

Create and share rubrics to standardise marking and to help learners understand your assessment criteria.

Tests & Quizzes

Use a variety of assignment types to create formative and summative assessments.

Progress Reports

Download reports to compare presenter scores, audience engagement and progress over time.

See for yourself how GoReact accelerates and humanises skills-based learning.

Simple to Set Up & Use

Essential Software for the Modern Edtech Stack

Getting Started

Browser + Webcam

No special equipment required, just a browser to use the software and a webcam or smartphone to record videos.

LMS Interoperability

Seamless integrations with leading learning platforms for grade passback, supported by OAuth authentication.

User Support

Support for instructors and students via ticket or chat with same-day target response.

Privacy & Security

GDPR Compliant

Fully compliant with the European Union's General Data Protection Regulation (GDPR).

Cloud Hosted

All data stored, processed and transmitted on secure cloud servers around the world.

Data Encryption

All data fully encrypted while at rest and in transmission. Managed by internal and external security experts.

Accessibility

WCAG Compliant

Designed to comply with the Web Content Accessibility Guidelines (WCAG) version 2.1, levels A and AA.

Closed Captions

Capable of displaying real-time closed captions with in-context autocorrections using the latest AI technology.

Native Tools

Compatible with screen readers and native accessibility tools in modern web browsers and operating systems.

See for yourself how GoReact simplifies video-based assessment.
